

BARTON

High-Performance Waterjet Abrasives

HPA™ Waterjet Abrasives **Workhorse Performance,** ***Exceptional Value***

Barton HPA waterjet abrasives combine excellent cutting performance with outstanding economy. They are ideal for a host of applications that do not require the extra-high-performance provided by our HPX waterjet abrasives.

Like all waterjet abrasives sold by Barton, they are manufactured under tight QC/QA controls and are guaranteed to meet our high standards.

With multi-national mining supply sources and regional distribution centers strategically located nationwide, Barton is your reliable source for high-performance waterjet abrasives.

BARTON

High-Performance Waterjet Abrasives

Select from our three most popular grades of HPA waterjet abrasives.

60 HPA™

Our most aggressive HPA product; used when cutting speed is of primary importance.

80 HPA™

A general-purpose abrasive that provides good edge quality and solid cutting performance.

May be used in virtually any precision waterjet operation.

100 HPA™

A finely graded product offering high precision and a narrow kerf. Used for thin-stock applications.

See for yourself!

Contact Barton for additional information and free samples of HPA high-performance waterjet abrasives.

Standard Packaging – 55-lb. paper bags, 2,200-lb. or 4,400-lb. bulk bags.
