

## ALLTEK™ Highly Versatile Garnet for Waterjet Cutting

---

BARTON® ALLTEK™ garnet abrasives combine excellent waterjet cutting performance with outstanding economy. They are ideal for a host of applications that do not require the extra-high performance provided by our HPX® ADIRONDACK® garnet.

- **WORKHORSE PERFORMANCE**
- **RELIABLE QUALITY**
- **OUTSTANDING VALUE**

Globally sourced alluvial garnet processed to BARTON's exacting standards, ALLTEK HPA® waterjet abrasives offer excellent surface quality and performance as well as outstanding value. ALLTEK is a versatile abrasive designed for reliable quality and excellent waterjet cutting performance. **Available in two HPA grades** as described on reverse side.

## Select from Two HPA® Grades of ALLTEK™ Garnet Abrasives

BARTON offers two HPA® grades of ALLTEK™ garnet abrasives manufactured under tight QC/QA controls and guaranteed to meet our high standards.

### 60 HPA

- Our most aggressive ALLTEK product, used when cutting speed is of primary importance
- A good choice when cutting thick or hard materials

### 80 HPA

- An all-purpose garnet abrasive that provides good edge quality and solid cutting performance
- May be used in virtually any precision waterjet cutting operation

**Standard Packaging:** 55-lb. paper bags, 2,200-lb. and 4,400-lb. bulk bags
