FUSION® Custom Abrasive for Waterjet Cutting

FUSION® is a perfectly balanced, custom blend of ALLTEK™ HPA® alluvial garnet and ECOTEK™ STL staurolite. It has been carefully engineered as a high-performance waterjet abrasive that balances cutting consistency with operating cost. FUSION delivers excellent cutting power and edge quality.

A BALANCED BLEND OF TWO PROVEN WATERJET ABRASIVES

ALLTEK HPA garnet abrasives are the waterjet industry standard. They are proven for their excellent cutting performance and are ideal for a host of cutting applications.

ECOTEK STL staurolite abrasives deliver solid cutting at a value price. Domestically produced from reliable American sources, ECOTEK is the choice for economical waterjet cutting abrasives.

The perfectly balanced combination of these two proven BARTON abrasives offers unprecedented cutting performance and value.

FUSION is available in an 80-mesh grade. All BARTON abrasive products are manufactured under tight Quality Assurance controls and are guaranteed to meet our high standards.
