## Select from Two HPA® Grades of ALLTEK® Garnet Abrasives

ALLTEK garnet abrasives are manufactured under tight QC/QA controls and guaranteed to meet our high standards.

### 60 HPA

- Our most aggressive ALLTEK garnet, designed for when cutting speed is of primary importance. A good choice when cutting thick or hard materials.

### 80 HPA

- The versatile workhorse of waterjet abrasives, providing good edge quality and solid cutting performance. Ideal for virtually any precision waterjet operation.

#### Standard Packaging:

55-lb. paper bags, 2,200-lb. and 4,400-lb. bulk bags.

#### Stocking Locations – North America:

ALLTEK HPA is stocked in more than 40 warehouses throughout the United States, Canada and Mexico for prompt local service across North America.
